---

## HISTORY OF EXPERIENCE

### Control & Instrumentation Project Coordinator

Nov 2017 – Jun 2020

Consolidated Contractor Company (CCC) – Kuwait

- Successfully completed instrumentation work in assigned project units in the green and brown fields within scope, schedule, budget and quality including:
  - o Installing of instruments, stanchions, junction boxes, frames and panels as per P&ID and location drawing
  - o Pulling and dressing under/above ground cables and installing of cable trays in the best available routes
  - o Glanding and terminating instrument cables using wiring termination diagram
  - o Installing impulse tubes and pneumatic airline system for instruments and control valves
  - o Installing Fire and Gas system using coordinates to ensure a high level of quality and safety
- Achieved mechanical project completion and pre-commissioning with loop-checking team without lost-time injuries
- Managed project documentation, reports, material take offs (MTOs) and material issue voucher requests

### IT Support Engineer

Jun 2014 – Oct 2017

Consolidated Contractor Company (CCC) – Kuwait

- Maintained the stability of the network by monitoring and resolving all IT issues in a timely fashion - including troubleshooting, incident investigating and root cause analysis
- Provided technical support and assistance to end users in person and via telephone, email and through tickets within the company head office and remote office locations
- Successfully assisted more than 100 users with the installation and configuration of desktop/laptop computers and peripheral equipment and software within established standards
- Managed active directory, user accounts, emails, access privileges and servers using Microsoft windows server
- Configured network devices like network printers and scanners and gave access for users
- Successfully completed building the network for site offices including installing racks, servers and switches and pulling the network cables
- Managed records keeping for all IT devices with their status in IT inventory
